## THE BETTER KITCHEN SCALE

With a footprint of only 9-7/8" x 4-1/4", and a choice of durable powder-coated finishes in a variety of designer colors, it is not surprising that this scale is featured in designer kitchens around the world.

This scale, which has been referred to as an "heirloom in the making", combines the rugged accuracy of our professional Bakers' Scale with a decorative flair to produce a scale that is both aesthetically pleasing and utilitarian. Made of cast iron with case hardened steel pivots and bearings, and a polished brass 1lb. beam in 1/4 ounce increments, this scale is available in a variety of configurations to meet your needs.

### Benchmark:

This indispensable kitchen tool features two (2) 6" cold rolled steel plates, a polished brass 1lb. beam in 1/4 ounce increments and three (3) free-weights ((2) 1lb., (1) 2lb.).

### Chef:

With the same two (2) 6" cold rolled steel plates, polished brass 1lb. beam and free-weights found on our "Benchmark", the "Chef" adds a Stainless Steel Scoop and counterweight, to create a scale ideal for the cooking enthusiast.

### Baker:

The "Baker" features one (1) 6" cold rolled steel plate and a claw that cradles our Stainless Steel London Style Scoop. Keeping with our entire line of Kitchen Scales, the "Baker" has a polished brass 1lb. beam in 1/4 ounce increments and three (3) free-weights.

### Gourmet: (also pictured on front)

The beauty of the "Gourmet" secures it a permanent home, on display, in the kitchen, while its utilitarian roots make it a solid choice for those precision measurements. In addition to the polished brass 1lb. beam and free-weights this scale has one (1) 6" cold rolled steel plate and a claw, with a Brass London Style Scoop.
